Public student profile

Connected resume summary, original document links, project links, and availability of coursework and college application materials.

CURRENT STUDENT PROFILE

Minh Pham

Computer science student, Carnegie Mellon University in Qatar. Resume lists study dates of August 2025 to May 2029. [M1-M2]

Resume summary

The resume lists C++, Rust, Zig and Python, along with systems, robotics, optimization and graphics tools. It describes a 2025 software-engineering internship at Human Union Data involving reinforcement-learning environments and task pipelines. Other experience includes mathematical-modeling work on drone path planning and teaching C++ at HSGS Code Camp. Listed projects include Mazegame and a Rust / WGPU Tetris implementation. These are the author's reported qualifications; no independent verification was performed. [M1]

Projects and connected accounts

The portfolio describes Mazegame, a competitive maze-generation and solving game; a browser-playable Tetris project; a campus marketplace; and additional games. It directly links the resume, GitHub and LinkedIn, establishing the source connection without matching names across unrelated sites. [M2]

Classes, applications and missing evidence

Classes: No named college courses were found in the reviewed resume or portfolio.
College application: No full application or admissions essays were found in these sources.
Learning records: No transcript, grades, diagnostic results or study-session history were supplied. Do not infer mastery, learning speed or study-method effectiveness.
